(54) Title: SIMULTANEOUS DETECTION OF TWO ANALYTES PRODUCED BY A CELL UNDER THE INFLUENCE OF A PUTATIVE AGENT USING A PIN COATED ASSAY SYSTEM

(57) Abstract: A method for identifying an agent that has an influence on the amount of an analyte expressed by a cell, said method comprising: - stimulating a cell to produce at least 2 analytes, - forming, in the absence and in the presence of a candidate compound, on the pins of a matrix at least 2 recognition complexes between an analyte and a recognition molecule, - treating said recognition complexes with detection molecules to obtain on the pins of the matrix detection complexes, - determining each amount of each detection complex formed on the pins, - comparing each amount of detection complex formed in the absence and in the presence of a candidate compound, and - choosing a candidate compound which has an influence on the amount of at least one of the detection complexes formed as a pharmaceutical agent.

INTERNATIONAL SEARCH REPORT

International Application No

PCT/03/04793

A. CLASSIFICATION OF SUBJECT MATTER
 IPC 7 G01N33/543 G01N33/53

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 7 G01N

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the International search (name of data base and, where practical, search terms used)

MEDLINE, EPO-Internal, WPI Data, PAJ

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.

* Special categories of cited documents:

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

T later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

X document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

Y document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
